Slat Wall Panel Acoustic Line Black

## O.K.WALL provides innovative and designer interior decoration solutions for home and business.

We have been manufacturing wooden doors and exterior doors as RADEX since 1986. When our doors had already become part of many interiors in Poland and Europe, we went a step further and created a range of products for interior decoration. This is how the O.K.WALL brand was created. With exceptional interiors in mind.

We present 5 phenomenal lines of products that will give character and a unique atmosphere to interiors in the comfort of your home as well as your business space.

The range includes wall louvres, including acoustic, free-standing and openwork louvres, as well as innovative wall decorations. The materials for our products are sourced in accordance with FSC® requirements. Therefore, by purchasing our products, together with us you support the responsible sourcing of natural resources.

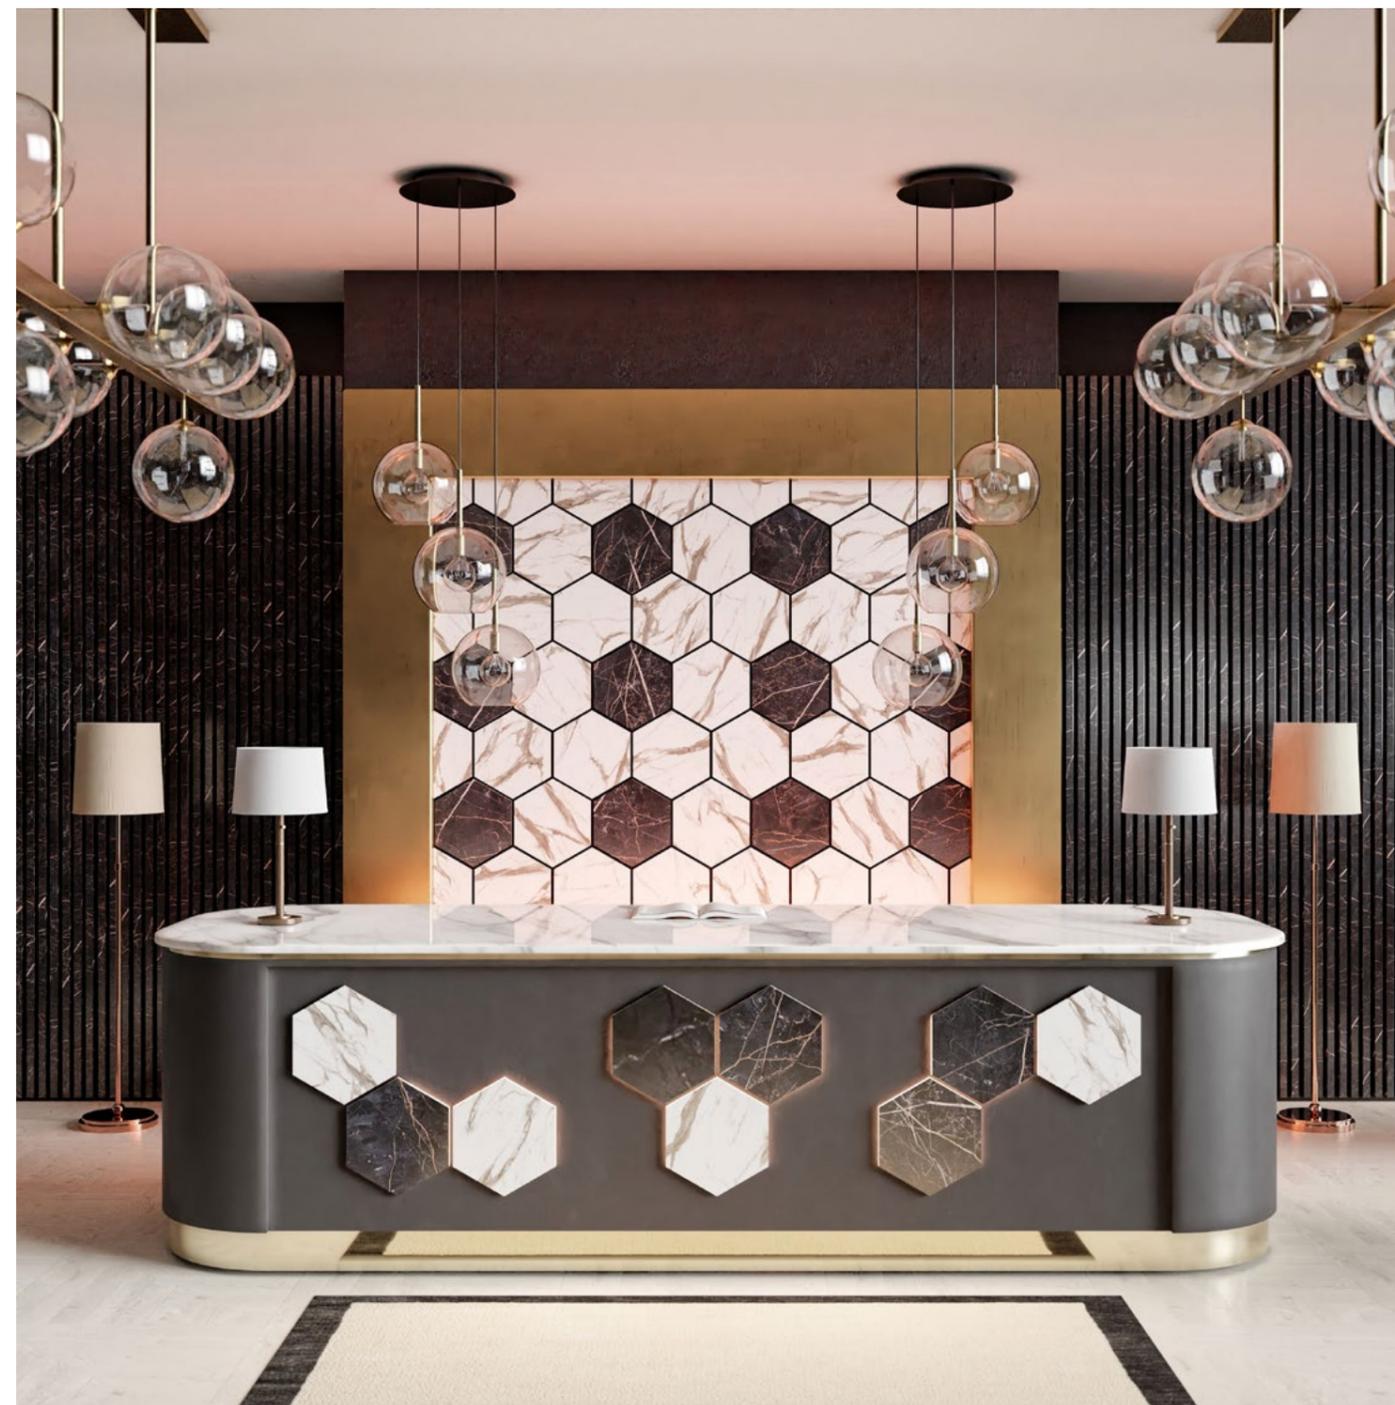

Modern design, nature vibe, style and ease of installation unite all our products. Transform your interior and give it a soul with O.K.WALL products.

Ask about the availability of all FSC® certified products.

Slat Wood Wall Panels Acoustic Line Black on black felt.

Hexagon wall decorative panels in white marble and black marble options.

# SLAT WALL PANELS BASIC LINE

## Slat Wall Panels Basic Line

Slat wood wall panels are a unique wall decoration which, depending on the selected colour, layout and place of installation, can create a unique interior style. From natural, eco character to prestigious, elegant interiors. Ideal to use at home, in the living room, dining room, bedroom and nursery or hall, as well as in the office space, restaurant or hotel. They are perfect as a home office solution when there is a need to optically separate the office space from the living space.

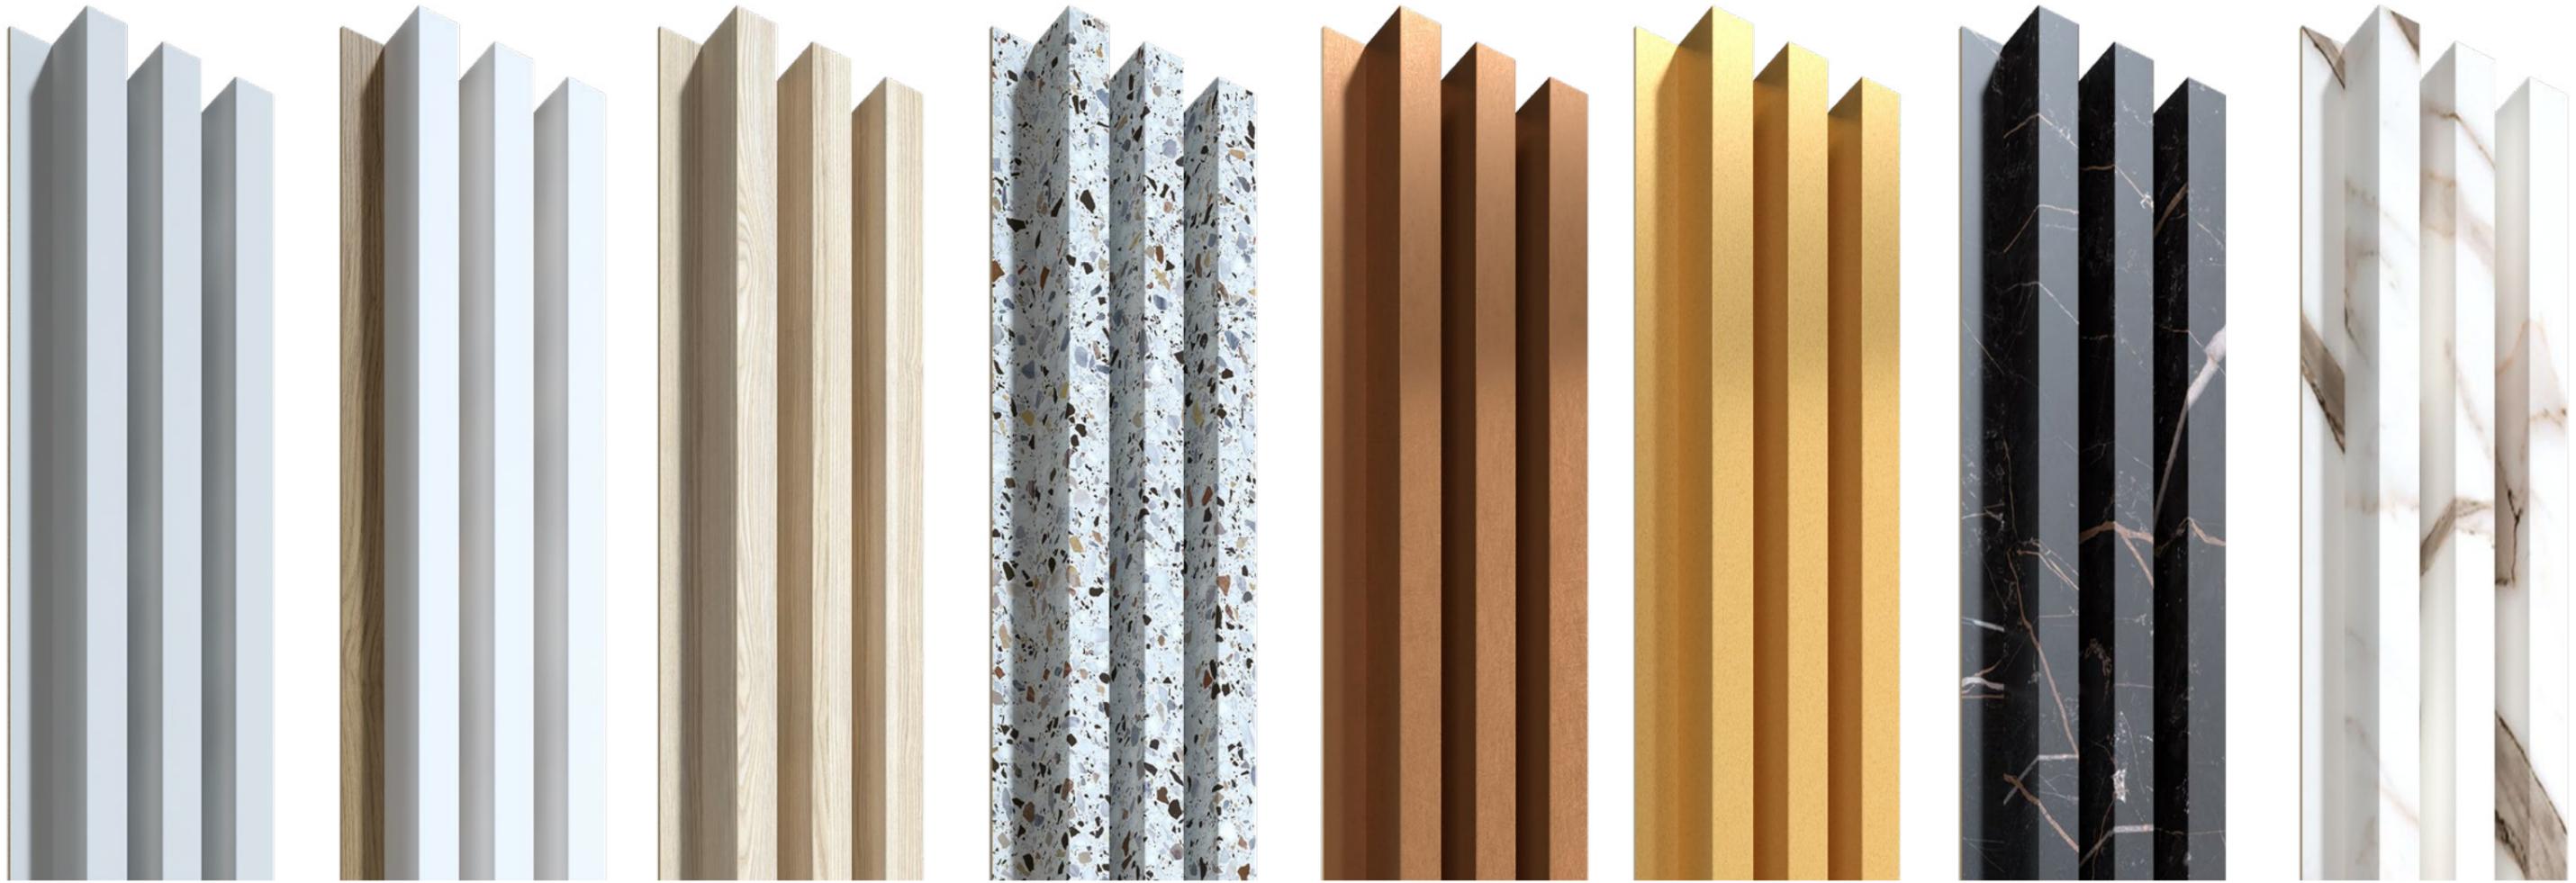

Our slat wood wall panels can be mounted both to the wall and to the ceiling. They can only be an interior decoration or also have a practical use, e.g. as a headboard or a front of a kitchen island.

Our slat wood wall panels from the Basic Line are made of 100% ecological materials, gained in accordance with the principles of responsible forest management. All our products are FSC® certified .

They are based on HDF and MDF boards, which makes them extremely durable and resistant to any kind of distortion.

# SLAT WOOD WALL PANELS ACOUSTIC LINE

## Lamella Acoustic Line

Wall panels from the Acoustic Line series are not only a decoration of walls and ceilings, but also a fantastic improvement of room acoustics. Thanks to the thick black felt underlay, sounds are partially absorbed, which significantly reduces the echo in the room. Acoustic Line panels will work well at home, in offices or public utility buildings, e.g. restaurants, hotels. Wherever you need peace, quiet or good sound quality. We recommend it for home offices or hotel rooms.

The lamellas come in a wide range of colors. In addition, the colors can be combined with each other and the slats can be mounted vertically and horizontally, which gives unlimited arrangement possibilities. Acoustic Line panels come in various sizes, so you can easily choose them to the specificity of the interior, or arrange a pattern with a 3D effect. The slats can be mounted both on the walls and the ceiling, thanks to which the acoustic effect will be even better.

Our lamellas are made of 100% ecological materials obtained in accordance with FSC® requirements.

Ask about the availability of all FSC® certified products.

# SLAT WOOD WALL PANELS SOLO LINE

## Decorative rotating slat wood wall panels

The slat wood wall panels Solo Line are not only an interior decoration, but also a great way to separate parts of the interior without inconvenient renovation. Rotating slat wood wall panels are mounted on appropriate feet to the floor and ceiling at certain intervals from each other. This allows you to place the slat wood wall panels in such a way so that they constitute a covering partition wall. The slat wood wall panels can be rotated independently of each other. Our product is a perfect solution to be used in studio apartments, where there is a need to isolate the sleeping area, but with the possibility of revealing it when we want to add some light to the interior. We also recommend it to be used in home offices, commercial offices, hotel lobbies or waiting rooms. The wide range of colours will make it easy to match slat wood wall panels to your interior.

Our slat wood wall panels are made of durable MDF board, 100% ecological materials. Solo Line slat wood wall panels are FSC® certified. By purchasing our products you support sustainable forest management.

Ask about the availability of all FSC® certified products.

# Easy and fast assembly

The way of assembly applies to panels from the Basic and Acoustic Line.

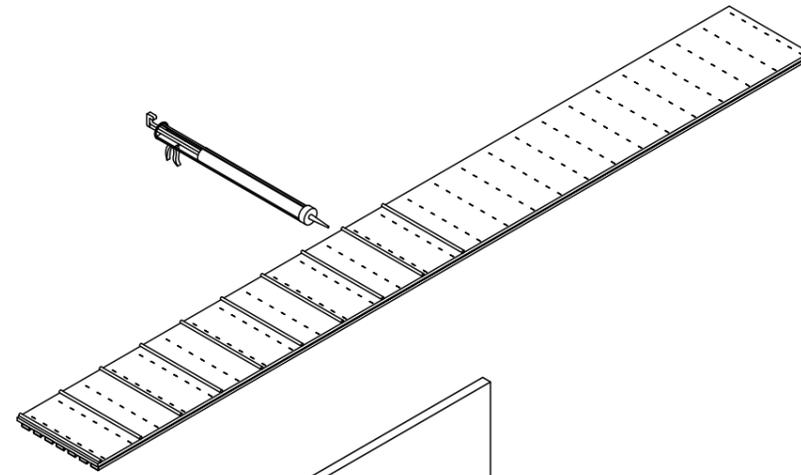

## Stage 1

Mark a vertical line on the wall for the first panel using a spirit level and set the starting board horizontally.

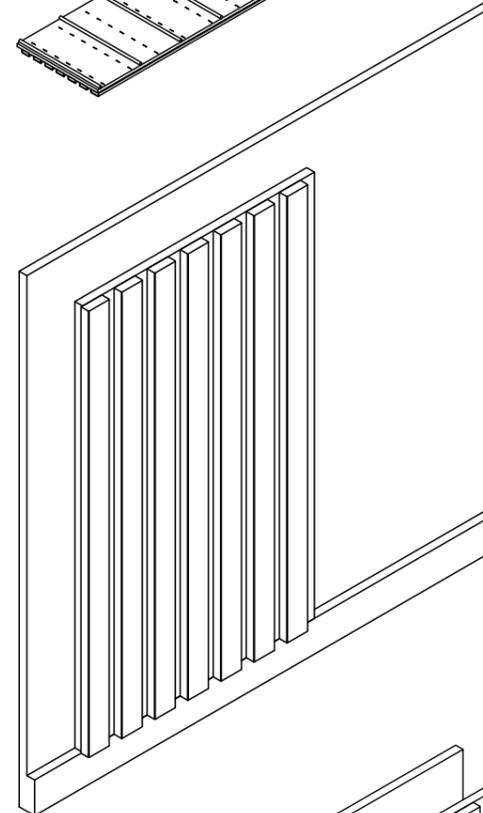

## Stage 2

Remove the panels from the packaging. If necessary, the panel should be cut to the appropriate length or width.

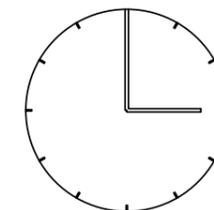

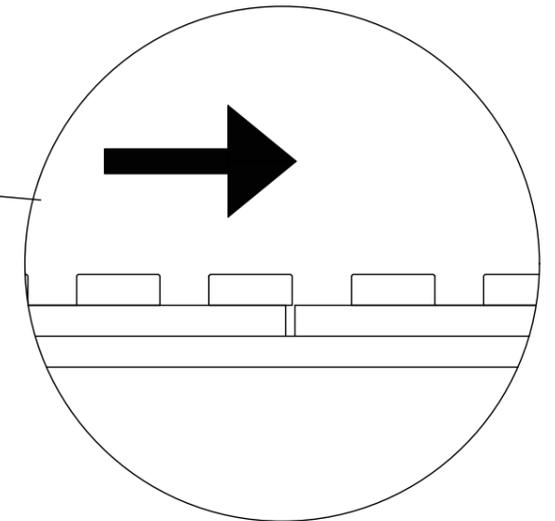

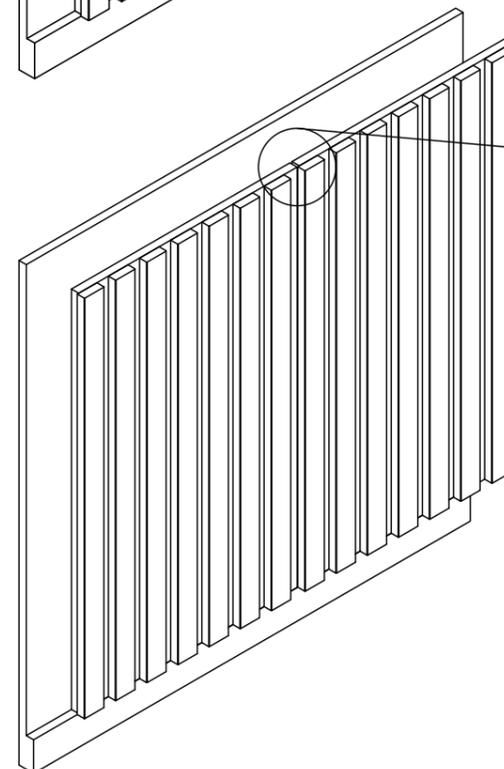

## Stage 3

Apply glue to the back of the panel in compliance with the instructions provided by the glue manufacturer.

## Stage 4

Press the panel with the use of glue to the previously drawn line against the wall and place it on the board.

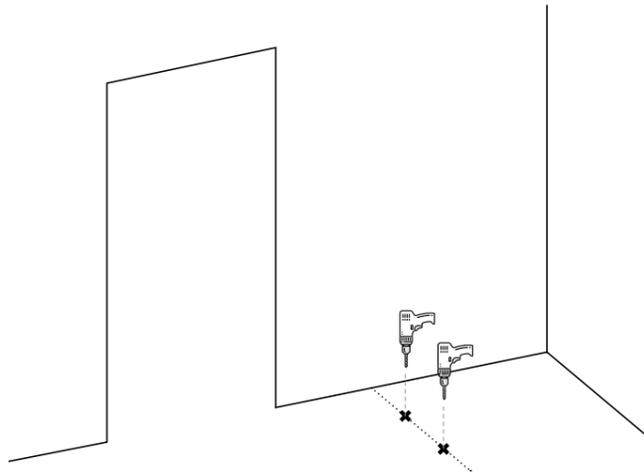

24 h

## Stage 5

Move the next panel to the previous one.

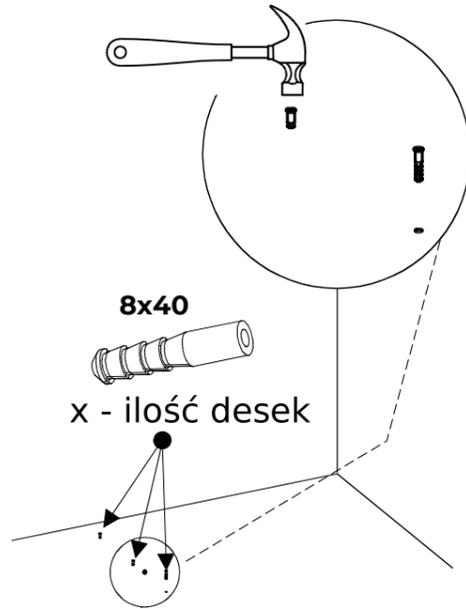

# Assembly of rotating panels

The way of assembly applies to the Solo Line rotating panels.

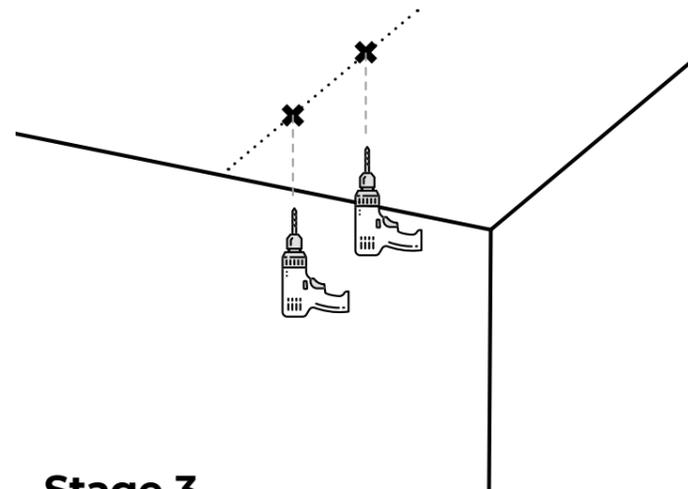

## Stage 1

Drill in line, until you have the desired number of rotating boards ready to be installed.

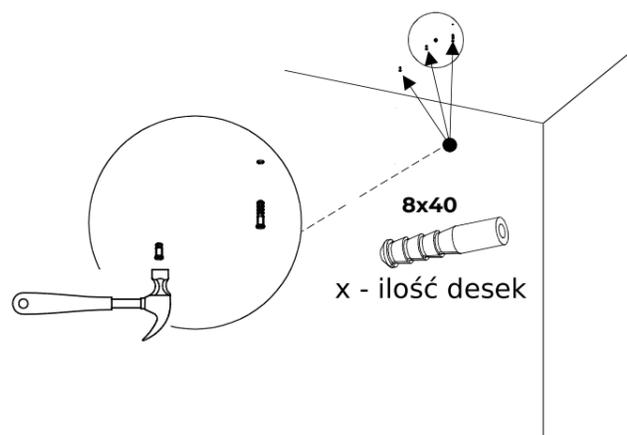

## Stage 2

Hammer the pegs into the holes.

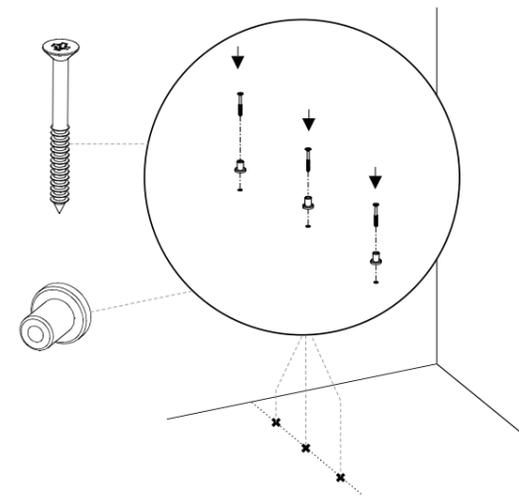

## Stage 3

Drill in line, until you have the desired number of rotating boards ready to be installed.

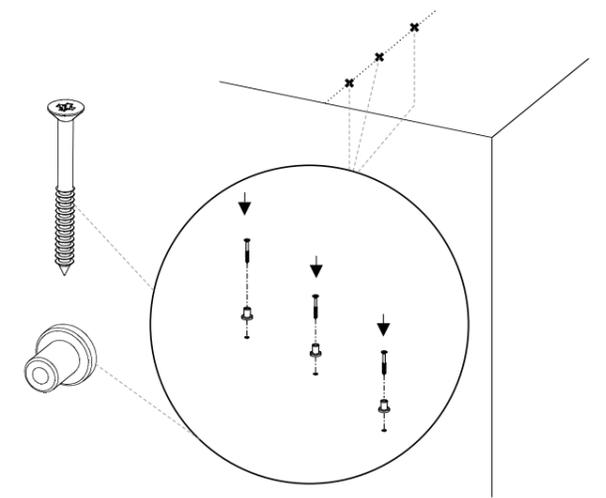

## Stage 4

Hammer the pegs into the holes.

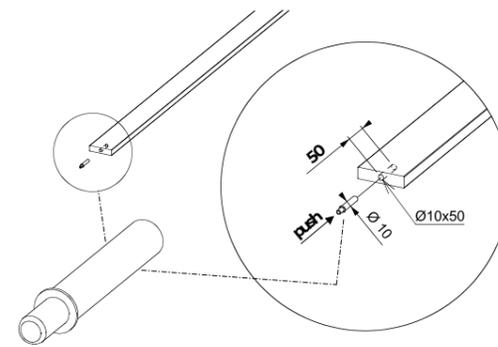

## Stage 5

The number of fittings depends on the number of rotating boards ready to be installed.

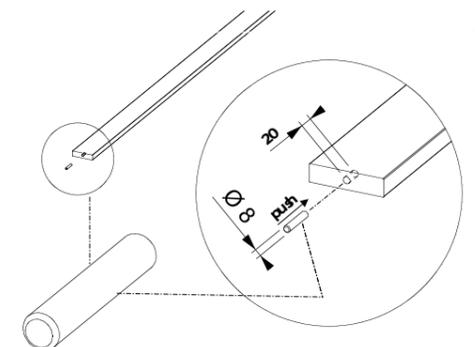

## Stage 6

The number of fittings depends on the number of rotating boards ready to be installed.

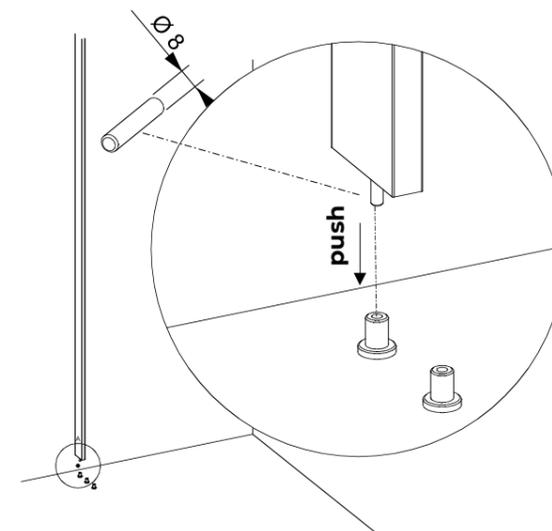

## Stage 7

Install the peg on the top of the rotating board.

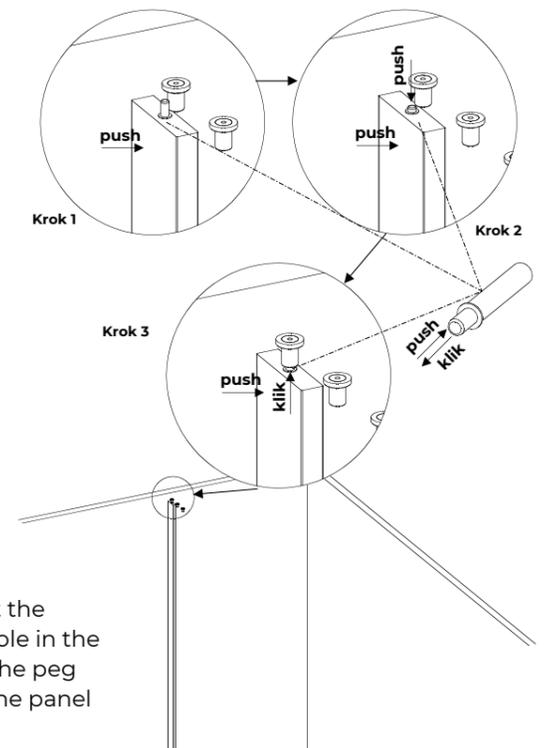

## Stage 8

Install the peg at the bottom of the rotating board.

## Stage 9

Install the board in the hole on the floor and push it into the hole in the fitting.

## Stage 10

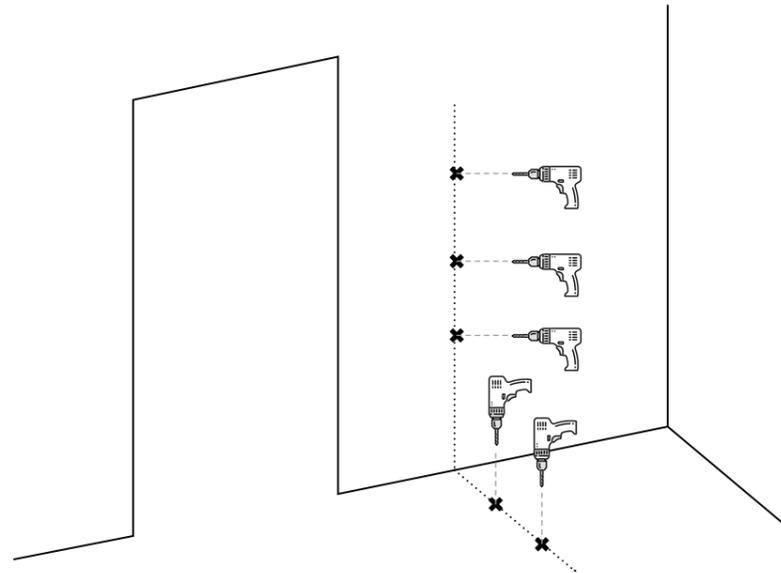

Click on the peg and fit the board into the fitting hole in the ceiling. Once in place, the peg will bounce and keep the panel inside.

# Assembly of openwork panels

The way of assembly applies to openwork panels from the Azure Line.

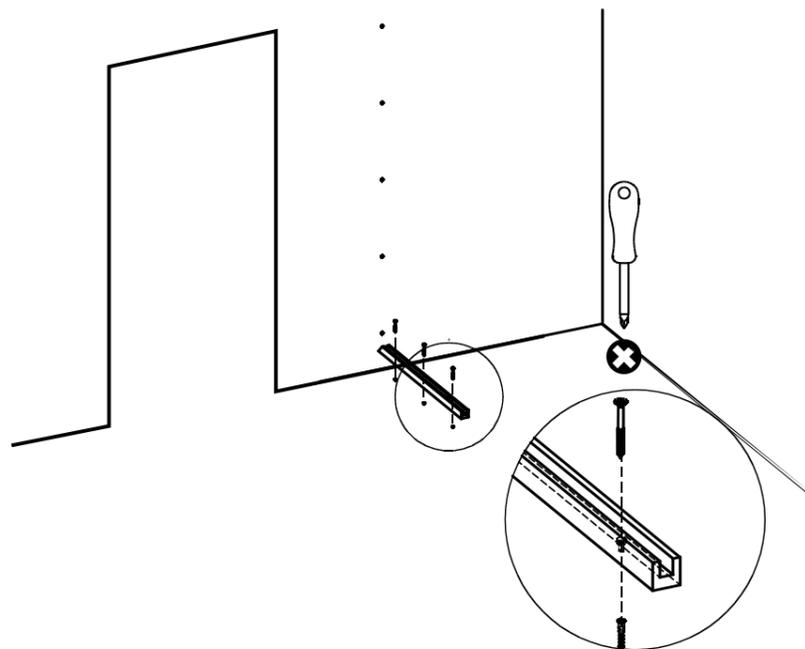

## Stage 1

Drilling in line, on the wall and floor, according to the number of pegs and holes in the boards.

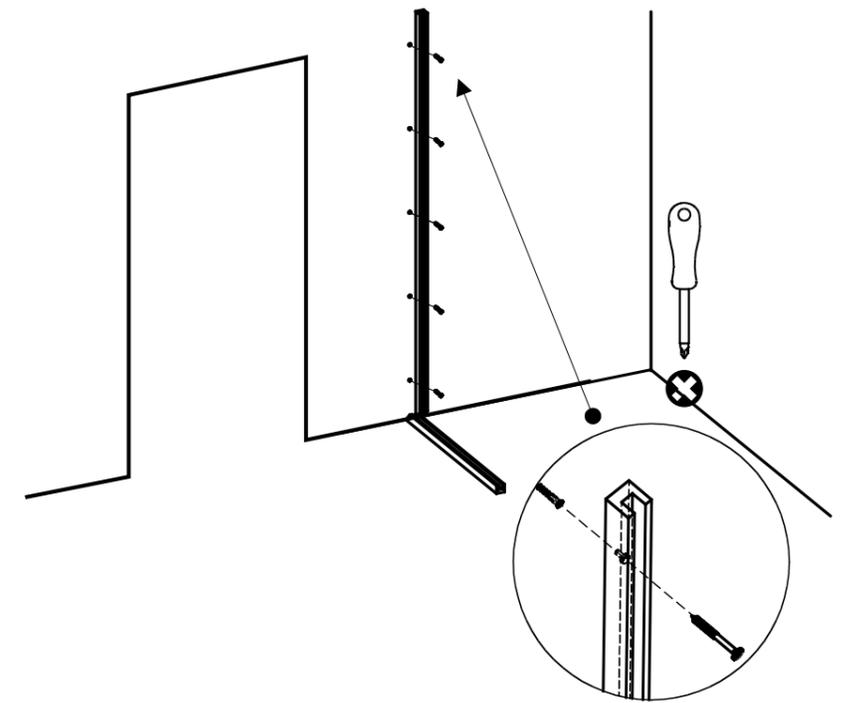

## Stage 2

Screw the board to the floor using the pegs.

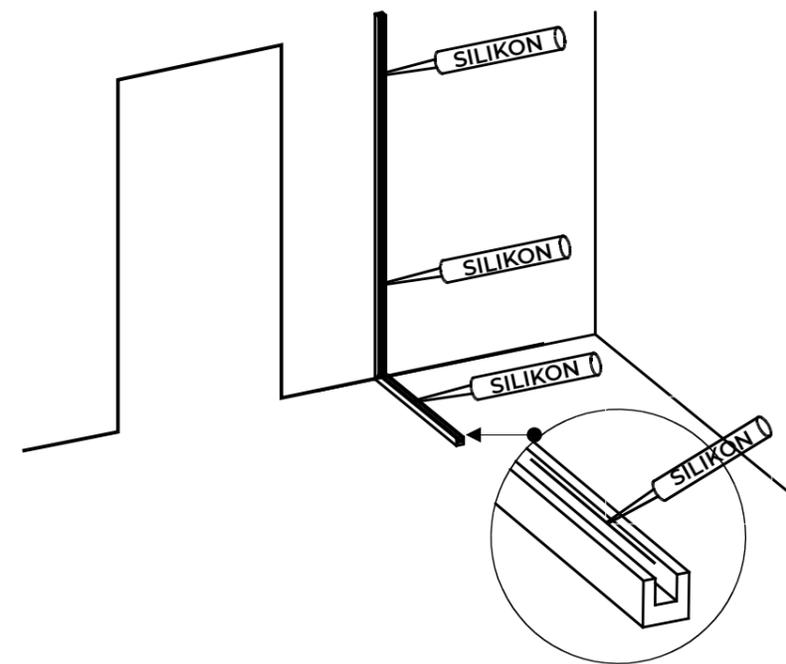

## Stage 3

Screw the board to the wall using the pegs.

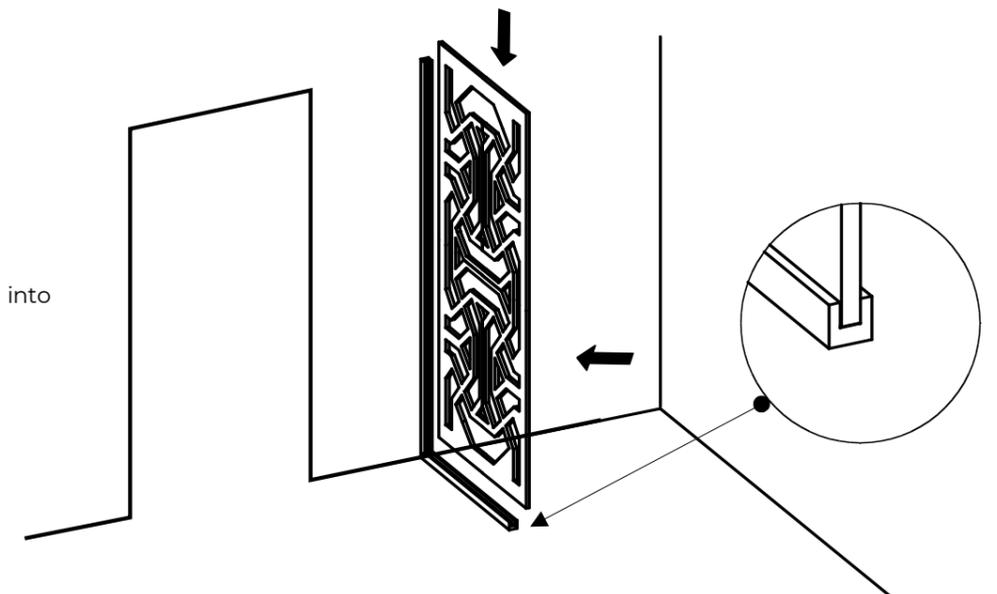

## Stage 4

Apply silicone to the centre of the rail in the support boards.

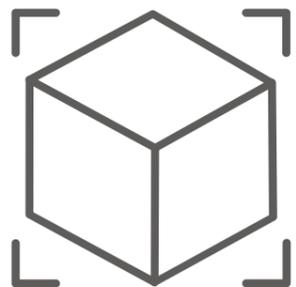

## Stage 5

Slide the decorative panel into the support rail.

## **Create beautiful interior design with our products!**

### **Ready 3D product library**

For interior architects, we provide the O.K.WALL product database for download in the form of three-dimensional models. Thanks to this, you can easily download our products to the software you use. You can easily show the client the interior arrangement with slats in a modern design or place the wall decoration directly on the room visualization.

### **Create another project with our range of products!**

Go to our website and download models of lamella panels, rotating blades and wall decorations for your projects today. Create unique interiors with O.K.WALL.

## The product is ready for sale

### Support for salespeople

As part of our cooperation, we offer the possibility of placing a stand with some samplers of slat wood wall panels. This will greatly facilitate the sale of our products in your showrooms. The stand will not only make it easier for customers to select the right slat wood wall panels, but it will also look great in the showroom.

### A clear and modern system of packaging

Our product is refined to the finest detail. Therefore, the packaging and instructions are also clear, legible and eye-pleasing. The O.K.WALL brand goes for the best. Go for it as well and you will achieve something with us!
